PROFILE SUMMARY

Cybersecurity enthusiast with practical experience in network administration, security operations, incident response, vulnerability assessment, and IT infrastructure support. competent in managing user access controls, tracking endpoint security, looking in to security problems, and assisting with vulnerability remediation efforts. competent with security technologies such as OWASP ZAP, Burp Suite, Nessus, Nmap, Wireshark, SQLMap, and Kali Linux. strong knowledge of Windows administration, Active Directory, networking principles, cybersecurity, and security best practices. Devoted to upholding organizational security standards, adhering to security protocols, and preserving secure environments.

EXPERIENCE

• DesignTech Engineering Consultants

June 2026 – Present

IT Support Specialist

Riyadh, Saudi Arabia

- Investigated and addressed malware infections, unauthorized access attempts, suspicious activity, and security-related occurrences, escalating problems as needed.
- Monitored endpoint security controls, system patching, and vulnerability remediation operations were monitored and maintained.
- To guarantee safe and dependable operations, network services such as TCP/IP, DNS, DHCP, VPN connectivity, routers, switches, and wireless networks were configured and troubleshooted.
- Supported remediation efforts, documented findings, and gathered pertinent data to aid in incident response actions.
- To find any threats and guarantee safe operations, regular security and system health checks were carried out.
- Used Microsoft 365 and Active Directory to manage user accounts, access permissions, and security rules in compliance with organizational access control regulations.
- Tracked remediation progress and helped resolve security flaws found in order to support vulnerability management efforts.
- Worked together with the IT teams to look into and fix security-related problems that affected network infrastructure, systems, and endpoints.
- Assisted with system maintenance, backup operations, restoration processes, and server management for Windows and Linux to guarantee company continuity.

Skills Learnt and Used: Technical Troubleshooting, Security Monitoring, Incident Response, Vulnerability Management, Odoo, Server Management, Backups, Windows & Linux Administration, Active Directory, Network Troubleshooting (TCP/IP, DNS, DHCP), Hardware & Software Support, Office 365, Jira.

• Hodos 360 LLC

July 2025– May 2026

Associate Software Engineer

Bangalore

- Developed and maintained web apps while adhering to secure coding guidelines to enhance application security and lessen frequent vulnerabilities.
- Through code reviews, testing, and remediation efforts, application security flaws were found and fixed.
- To improve access control and safeguard sensitive data, authentication, authorization, and input validation procedures were put in place.
- Reviewed logs, looked into system behavior, and supported root-cause analysis to help troubleshoot application issues.
- Worked together with the testing and development teams to enhance application dependability and address security issues.
- Maintained technical records pertaining to security enhancements, testing outcomes, and application modifications.
- To enable safe software deployment procedures, version control and testing tools were used.

Skills Learnt and Used: Secure Coding Practices, OWASP Security Principles, Python, Java, SQL, Git & GitHub, REST APIs, Authentication & Authorization.

• CDAC Bangalore - [Link](#)

April 2025 - June 2025

Cyber Security

Bangalore

- Conducted penetration tests and vulnerability assessments on web apps to find security flaws and possible points of attack.
- Performed security testing and analysis using security tools such as OWASP ZAP, Burp Suite, Nessus, Nmap, and SQLMap.
- As part of incident handling drills, I helped analyze security occurrences, look into findings, and record observations.
- Acquired hands-on experience with IDS/IPS technology, network security monitoring, incident response protocols, and SIEM ideas.
- Created thorough security assessment reports and kept track of risks, vulnerabilities, and remedial measures.
- Produced technical reports and provided remediation recommendations to stakeholders.

Skills Learnt and Used: Owasp top 10, VAPT, SIEM Fundamentals, Incident Response, IDS/IPS, Vulnerability Assessment, Penetration Testing, Security Monitoring, OWASP Top 10, Networking, Security Reporting.

• Rooman Technologies - [Link](#)

Sept 2024 - Feb 2025

Data Quality Analyst Intern

Bangalore

- Through organized analysis and reporting, I helped track problems with data quality and look into discrepancies.
- Maintained records, reports, and validation outcomes to support documentation and governance procedures.
- Worked with cross-functional teams to find and fix data-related problems that had an impact on company operations.
- To increase insight into operational KPIs and data trends, Power BI and Python were used to create reports and dashboards.
- Used best practices for data handling when handling sensitive and important company data.
- Participated in efforts to enhance data reliability and reduce mistakes through process improvement.

Skills Learnt and Used: Risk Management, Data Security Practices, SQL, Python, Pandas, Power BI, Data Reporting, Data Visualization.

• Colt Assist-Ultnity Technologies Pvt. Ltd.

Oct 2023 - April 2024

Web Developer

Bangalore

- Designed and developed a user-friendly online grocery management interface.
- Developed secure web applications, applying secure coding practices to prevent common vulnerabilities such as SQL Injection and Cross-Site Scripting (XSS).
- Performed regular code reviews and vulnerability assessments on web applications.
- Improved system efficiency and vendor interaction by streamlining data flow.
- Achieved an average file review quality score of 80% or higher.

Skills Learnt and Used: Secure Coding Practices, HTML5, CSS3, SQL, Web Application Security.

SKILLS

- **Security Monitoring & Incident Response:** Security Event Monitoring, Incident Response, Incident Documentation, Threat Detection, Malware Analysis, Security Escalation, Security Operations.
- **Vulnerability Management:** Vulnerability Assessment, Vulnerability Remediation Tracking, Risk Assessment, Security Testing, Security Reporting.
- **Access Management & Administration:** Active Directory, User Access Management, Access Control, Authentication & Authorization.
- **Network Security:** Nmap, Wireshark, WEP, WPA, WPA2.
- **Security Concepts & Practices:** SIEM Fundamentals, IDS/IPS, Security Policies, Security Compliance, OSINT Framework.
- **Tools:** Kali Linux, Wireshark, Metasploit.
- **Pentesting Tools:** OWASP(ZAP), SQLmap, John the Ripper, Burpsuite, Nikto.
- **System Administration:** Windows Server, Linux Administration, Group Policy Management.
- **Network Administration:** TCP/IP, DNS, DHCP, VPN, Routing & Switching, Wi-Fi Troubleshooting.
- **Reporting and Documentation:** Creating detailed penetration testing reports with findings, recommendations, and remediation steps.
- **Scripting & Programming Languages:** PowerShell, Bash, Python, C++.
- **Web Technologies:** HTML, CSS.
- **Database Management:** MySQL.
- **Tools and Frameworks:** PowerBI, Django.
- **Office Applications:** Microsoft Word, Microsoft Excel, Microsoft PowerPoint.
- **Soft Skills:** Effective Communication, Team Leadership, Collaboration, Problem-Solving, Adaptability, Time Management.

EDUCATION

- **HKBK College of Engineering** Oct 2021 - July 2025
Bachelor's in Computer Science Engineering Bengaluru
GPA: 6.8/10.0
- **Royale Concorde PU College** July 2019 - July 2021
Pre-University Education Bengaluru
Percentage: 75%

PROJECTS

- **SOC-LAB-Setup:** [Github](#)
Tools: Wazuh SIEM, Sysmon, Kali Linux, Nessus, Nmap, Wireshark, Windows Security Logs
 - Built a SOC monitoring lab environment using Wazuh SIEM and Sysmon to collect, analyze, and investigate endpoint security events, authentication logs, and suspicious activities.
 - Simulated and investigated security incidents including brute-force login attempts, suspicious PowerShell activity, and malware detection scenarios to practice alert triage and incident response workflows.
 - Performed vulnerability assessments using Nessus and network reconnaissance using Nmap to identify security weaknesses and track remediation activities.
- **Medical Recommendation System :** [Github](#)
Tools: Python, Machine Learning – NLP, MySQL, Framework – Django.
 - Project which helps the user to get medicine based on the input symptoms given, where a machine learning algorithm recommends a medicine after consulting the doctor.
 - The integration of these technologies in medical recommendation systems enhances the ability to provide personalized, accurate, and timely recommendations, ultimately improving patient outcomes and healthcare efficiency
- **Fashion Recommendation System:** [Github](#)
Tools: Python, OpenCV, CNN (ResNet50).
 - Developed Fashion Recommendation model, achieving automated styling outfits.
 - Image recognition and processing, a machine learning and deep learning project to recommend an outfit.
